

# Ariel Martin

WEB DEVELOPER

5 Brown Ave, Roslindale, MA, 02131

ieloletin@gmail.com

419.360.2989

**SUMMARY:** Whether creating full-stack web applications, treating and transporting people having medical emergencies or building and maintaining aquatic exhibits, I am experienced in meeting goals under strict deadlines. I am driven and dedicated to creating products that are practical, functional tools which help simplify people's lives.

## Experience

### Dana-Farber Cancer Institute / Web Developer

May 2017 - Present | Boston, MA

- Created an Angular 5 frontend for an existing production application
- Utilized Angular 5 to create features for a v1 production application
- Participated in weekly code reviews

### Dana-Farber Cancer Institute / Web Developer Intern

March 2017 - May 2017 | Boston, MA

- Created an Angular 4 proof of concept application with a small team
- Utilized Spring Boot to create RESTful API endpoints
- Created documentation for a web application proof of concept
- Collaborated with other developers in an Agile workflow
- Utilized GitLab for version control

### General Assembly / Full-Stack Web Developer in Training

October 2016 - January 2017 | Boston, MA

Built full-stack applications during a 12-week web development immersive, by creating and utilizing:

- RESTful APIs and single-page applications
- Version Control (Git and GitHub)
- User Stories, Wireframes and ERDs
- Pair programming, working as part of a team and individual coding

## Job Experience

### Boston EMS / Emergency Medical Technician

January 2014 - October 2016 | Boston, MA

- Responded to emergency calls placed via the 9-1-1 system.
- Assessed and treated the diverse population of Boston citizens, according to local and state protocols, including administering medications.
- Transported patients to local hospitals.
- Documented care provided to patients and communicated pertinent information to hospital staff.

### New England Aquarium / Aquarist

February 2010 - January 2014 | Boston, MA

- Provided animal husbandry for marine and freshwater organisms.
- Maintained life support systems and aquatic environmental parameters.
- Interviewed, hired, trained and supervised volunteers and interns.

## Skills

Angular	CSS	JavaScript
Handlebars	Ruby	Ruby on Rails
JQuery	SQL	PostgreSQL
Express.js	Git	Ember.js
Bootstrap	SCSS	MongoDB
Node.js	AJAX	Mongoose
Spring Boot	Java	HTML

## Education

### Northeastern University 2009

Boston, MA

Bachelors of Science: Biology
