419.360.2989

SUMMARY: For me, web development is about growth and change. I am always learning, problem-solving, dissecting issues and acquiring new skills as I code. Whether I am working alone, pair-coding or contributing to a team, my methodical approach to building and testing small components and assembling them to create a functional product is one of my greatest assets. I am excited to continue to expand my skills and create products that assist users and make daily tasks more manageable.

Experience

General Assembly Web Development Immersive

October 2016 - Current | Boston, MA

Built 4 full-stack applications with various technologies during a 12-week bootcamp, including the following:

- **Digital Bookshelf** | Ruby, Ruby on Rails, Handlebars, JavaScript, HTML

A personalized review and reading list application for book lovers.

- **Watchy McWatchface** | MongoDB, Express.js, Handlebars, JS, Node.js

A digital storefront application for consumers in the market for high-end wristwatches.

- **Merge This** | Ruby, Ruby on Rails, Handlebars, JavaScript, HTML

A collaboration application for teams managing projects with GitHub.

Job Experience

Boston EMS / Emergency Medical Technician

January 2014 - October 2016 | Boston, MA

Responded to emergency calls placed via the 9-1-1 system and interacted with the diverse population of Boston citizens in their homes, at work and outdoors, in all weather and sometimes hazardous environments. Assessed and treated patients according to local and state protocols as well as the standard operating procedures of Boston Emergency Medical Services. Administered medication and assisted paramedics with select medical treatments.

New England Aquarium / Aquarist

February 2010 - January 2014 | Boston, MA

Provided animal husbandry for marine and freshwater organisms through food preparation, feeding, cleaning, assisting with and administering medical treatments and recording observations of animal behavior. Maintained aquatic environmental parameters. Interviewed and hired seasonal interns. Supervised and trained volunteers and interns in animal handling, collection and husbandry.

Skills

HTML	CSS	JavaScript
Handlebars	Ruby	Ruby on Rails
